Many thanks to Mrs V Kilby and Miss H Collings for inviting me to judge at their 26th Championship show . Thank you to the Birman Cat club for the hospitality. A very special thank you to Ms Anita Platt for agreeing to steward for me, her careful and considerate handling of the many wonderful exhibits made the day run smoothly, she also provided excellent company during our very busy day. A big thank you to all the exhibitors who made the show day possible by entering such a lot of wonderful birmans.

CLASS 20
BLUE POINT BIRMAN KITTEN FEMALE
14 WEEKS – 6 MONTHS

1ST FARRINGTON'S AVILALEYCHEN CHICHI (13C2) F 22/6/09

A very pretty girl, with excellent head type. She was just a little grumpy when out of her pen today.

Strong, broad, rounded skull with medium ears set well apart. Excellent solid mask developing well and matching solid blue-grey to ears. Medium nose with slate grey nose leather. Strong chin, level bite. Full cheeks. Chin was very pale, with the possibility of white in amongst the base colour, but I gave her the benefit of doubt today as just a baby.

Almost round eyes of excellent deep blue. Correct eye set.

Well grown body all in proportion and good bodyweight. Medium limbs and short strong paws.

Medium length tail, full, bushy and excellent blue grey solid colour.

Blue-grey points colour developing well and matching.

Long, silken coat of glacial white, slight halo to the shoulder area. Wonderful full ruff developing.

Her right glove is slightly fuller than the left. The left glove dips slightly between the two inner toes. Socks match, and are even. The left gauntlet tapers nicely towards the point of hock, then widens out again ending in a hook towards the inner side of the leg. The right gauntlet is shorter and tapers neatly to a point 2/3 towards the point of hock.

Beautifully prepared..

2ND ALLEN'S TISANTI VIOLETTA (13C2) F 11/5/09

A very sweet girl, with lovely temperament.

Rounded skull, that needs a little more width between her ears for better overall balance. Medium nose, with slate grey nose leather. Her bite appears fractionally undershot, but may be due to teething at present.

Almost round, rather deep set eyes of two tone blue, being paler around the rim. Her eyes themselves had a pink rim today and looked slightly sore. She had spectacles around the eyes also. Her mask is still developing. Cheeks filling out, and whisker pads still pale in colour as yet.

Well grown body, just needing a little more bodyweight, medium limbs, good bone, short strong paws.
Medium length tail, well furnished.
Deep grey- blue points colour developing well and matching.
Long, silken coat of glacial white, slight blue halo to top of body.
Matching gloves, the white travels right up to the stop pad on the left one. Matching even socks, gauntlets taper to a point, 2/3 towards the point of hock, the left then has a hook that curves towards the inner leg.
Fabulously friendly girl, just not quite in top condition today. Coat beautifully prepared.

CLASS 31

Well grown body, with excellent bodyweight. All in proportion. Medium limbs with short strong paws.
